Remote Prescription Entry Division of Comprehensive Pharmacy Services Named Rx RemoteSolutions

MEMPHIS, TN (November 10, 2009) Comprehensive Pharmacy Services (CPS) announced the company's new remote prescription approval and order entry division name is Rx RemoteSolutions. This significant expansion of CPS' business was spurred through the acquisition of RxKnights, Inc., a successful remote prescription approval and order entry business located in Naperville, IL, in June.

"Leveraging CPS' significant nationwide support resources with the Rx RemoteSolutions division enables the organization to address the need for these services to be readily available at a level yet to be seen in the industry," said Don Nickleson, CPS President and Chief Executive Officer.

Upon the acquisition, all RxKnights operations were absorbed into the Rx RemoteSolutions division, which provides hospitals and health care facilities a high quality and affordable option for safely providing pharmacy services on a 24/7 basis.

CPS is the nation's leading pharmacy services provider, serving acute care and specialty hospitals, medical centers and healthcare facilities. Currently, CPS works with 250+ client facilities in 44 states (including Puerto Rico and the USVI), employs 1,600+ pharmacy professionals and benefits from 38 years in the industry. For more information about Comprehensive Pharmacy Services, the acquisition of RxKnights Corporation, interviews or photos, please contact Amy Howell at 901-521-1453.
